

My classroom management philosophy is based upon Love and Logic. The classroom environment will emphasize support, respect, and being conscious of our actions. We will focus on building relationships and creating a sense of community within the gymnasium. Procedures will be emphasized to promote a safe and fun learning experience! The procedures will allow for the students to work together to meet my expectations, but will also allow them to hold each other accountable. There will be expectations of preparedness, participation, and positivity. The students will be given control of their own actions, if expectations are not met, logical consequences will be given as we see fit. I have an Open Door policy to try and help any student that may need it, and with any situation. I understand I may be just their teacher, but I also want to be a role model.
